

# Getting The Right Regulator

Firstly you need a bottle of gas, only one type of regulator will fit your bottle easiest way is to determine the make CALOR, CAMPINGGAZ or ALTA GAS

If your bottle is CALOR and is a 4.5kg then you will need the SCREW-IN BUTANE REG

If it is above 4.5kg (7kg, 15kg) then you will need a CLIP-ON REG.

If your bottle is CALOR red gas bottle then it is the PROPANE REG to fit regardless of size.

Finally if you have a CAMPINGGAZ bottle then it is the CAMPINGGAZ REG only one type
